

Winona State University

Guidelines and Policies Related to Grants

1. **PURPOSE:** To establish the responsibility for providing information and assistance in the development of grant applications/proposals to project directors and others. In addition, this administrative regulation will outline the in-house application submission process.
2. All grants for approved research and sponsored projects are the legal and fiscal responsibility of the institution and are, therefore, awarded to Winona State University, rather than to the project director. Although the project director is held individually responsible by the University for the proper management of the grant and for meeting the objectives of the grant, it is the University which will ultimately be held responsible for the overall administration of all funded projects. Therefore, all funds related to grants, regardless of source, shall be administered as University funds in accordance with Minnesota State Law, State University Board Rules and Regulations, Winona State University Rules and Regulations, and the publication *Business Office Procedures Manual* and subsequent revisions, and all guidelines set up by the State of Minnesota, Department of Procurement. The project director is hereby designated as the person responsible for sound administration and adherence to the procedures outlined above.
3. Individual faculty and administrative staff shall not solicit funds or accept funding from agencies, either public or private, without first consulting with the Director of Grants & Sponsored Projects. Only those proposals following the procedure outlined in this document may be submitted in the name of Winona State University, its colleges, and departments.
4. The Director of Grants & Sponsored Projects is primarily responsible for educating the University Community about funding sources, procedures and regulations, while assisting project directors in the development and submission of funding proposals to Federal, State, and local governments, as well as to corporations, foundations, and other public and private organizations other than governments.

The Director of Grants & Sponsored Projects is primarily responsible for:

- Providing the information about potential funding sources.
- Assisting the proposal writer with the internal approval process.
- Developing the policies concerning indirect cost rates and negotiating with government and non-government agencies concerning budgets (including indirect costs).
- Providing leadership to the management of all University grants and serving as the University's liaison with the Federal and State governments, the State University Board Office, and other agencies.
- Maintaining the official institution file for each project.
- Representing the University in negotiations if changes in the approved budget become necessary.
- Interpreting state and federal laws, regulations and contract agreements.

Regulation 2-8

- Submitting all grant proposals where appropriate, to the State clearinghouse, the Department of Administration, and the State University Board Office.

The Office of Finance and Administrative Affairs is primarily responsible for:

- Ensuring that the grant budget is compatible with all University rules and regulations.
- Maintaining complete accounting records for each grant.
- Informing the Project Director immediately upon establishing any required matching funds account, and assisting with procuring equipment, supplies, and materials.
- Preparing fiscal reports and meeting the fiscal guidelines of the granting agencies.
- Cooperating with the Director of Grants & Sponsored Projects concerning indirect cost rates and regulations.

5. The project director will have responsibility for:

- Preparing the written project proposal.
- Securing required University facilities, equipment, and supplies in consultation with the appropriate Department and Dean.
- Advising the Director of Grants & Sponsored Projects immediately upon receiving notification of a grant award or denial.
- Preparing and administering a coded internal budget in consultation with the Budget Director.
- Assisting the Office of Finance and Administration in preparing the fiscal reports.
- Assisting the Director of Grants & Sponsored Projects with any final reporting requirements and post-grants needs.

6. The normal sequence of events in developing an application/proposal is as indicated on Attachment A. As a part of the internal review process, the project director must meet any application/proposal approval requirements established by his/her department and/or college; must secure approvals from the [WSU Human Subjects Committee](#), [WSU Institutional Animal Care and Use Committee](#), and/or other regulatory approvals, if required; and must secure the signature commitments of his/her Department as indicated by the Chairperson's signature, Dean and/or other individual(s) authorized to commit resources in support of the project, if required, on the *Transmittal Form for Grants & Sponsored Projects* (available in [Word](#) format). All signatures must be secured prior to submission of an application/proposal. This applies whether the application/proposal is submitted via hard copy or electronically.

The Director of Grants & Sponsored Projects will then circulate the Transmittal Form and final grant copies for the remaining required signatures. Because persons in the approval chain are making decisions which often affect programs, facilities, budgets, or employment, it is incumbent upon each proposal writer to begin the approval/review process as far in advance of the funding agency's submission deadline as possible.

7. It is the policy of Winona State University to include indirect costs on all proposals. Indirect costs are in recognition on the part of funding agencies of the overall cost experienced by grantee institutions as a direct result of providing space, utilities, personnel, and administrative support to grants and research projects. It is the responsibility of the proposal

Regulation 2-8

writer to include indirect costs in the grant proposal. If the sponsoring agency does not allow indirect costs or allows less than WSU's current rate, the project director must attach documentation that clearly states this policy as justification for requesting a non-standard rate.

Winona State University has an established indirect cost rate with the U.S. Department of Health and Human Services based on a percentage of 44% of salaries, wages and fringe benefits. The project director must contact the Director of Grants & Sponsored Projects for the current rate when figuring the amount of indirect costs.

8. The notification letter from the funding agency indicating an approval or denial must be brought to the attention of the Director of Grants & Sponsored Projects immediately upon receipt. The Director of Grants & Sponsored Projects will then inform the Project Director, Department, Dean, other individual(s) who committed resources in support of the project, and the Office of Finance and Administration of any grant award notification received; will fulfill all state agency reporting requirements; and will deliver any required letter of acceptance, letter of agreement, contract, or other such document to an *authorized official* (President or Vice Presidents) for his/her signature.
9. Only *authorized officials* (President, or Vice Presidents) are to accept and sign for funds from any source either public or private.
10. **Multiple Submissions:** In instances where WSU faculty and staff prepare competing grant applications for submission to the same funding source program, which formally prohibits or informally discourages submission of multiple applications from a single institution, WSU will approve the submission of only one of the applications. Faculty and staff are encouraged to notify the Grants Director of their intent to submit a grant application as soon as they decide to do so. As soon as the Grants Director becomes aware that potentially competing applications are under preparation, the Director will work with the applicants to facilitate preparation of a collaborative proposal. If such collaboration is not feasible due to proposal content and/or time constraints, the Director will notify the appropriate Dean. The Deans' Council will recommend to the President which application will be submitted.
11. **Institutional Commitment:** For grant applications requiring matching funds, grantwriters should contact the Grants Director at least two weeks in advance of the application deadline with a brief written description of the proposed project (no longer than one page) and a list of institutional commitments anticipated during and after the grant period. The Grants Director will assist the grantwriter in identifying which individuals on campus are authorized to make specific institutional commitments and encourage the grantwriters to secure those tentative commitments immediately. They may do so using the standard grants Transmittal Form.

This WSU Regulation supersedes the WSU Regulation 2-8 dated October 1, 2002.
